## Motivation

My aspiration is to work as a proactive sustainability consultant and contribute towards climate neutral reconfiguration of the socio-economic system that is environment friendly, socially inclusive, and climate neutral. In recent years I accumulate a lot of academic and voluntary experiences in circular economy in Sweden and Norway. I thrive to contribute towards the sustainable transition with the frontiers of climate heroes in the Scandinavia and actively contribute to build global alliance to implement this change as fast as possible. Previously for more than six years, I have dedicated to infrastructural and social development in the private sectors based in Bangladesh, China and Indonesia.
